DETAILED ACTION

Response to Amendment

1. Applicant's amendment to Figure 9 to correct typographical error is acknowledged.
2. Applicant's arguments regarding the allocation sites are acknowledged. However, since identification of one or more allocation sites inside the body of each method is a feature of the invention specified in the claims, objection to the drawings is maintained because no Figure illustrates the features of the amended claims.
3. Applicant's amendment to the claims inadvertently made claims 8 and 9 identical to claims 1 and 2.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "call graph representation includes a corresponding node", "method M", "single body B", "methods M', M", "allocation sites", "types of objects" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention because:

at claims 1, 8, 10, it is not clear

- how method M is related to methods M' and methods M" and how each method plays a role in the construction of a call graph?
- how an object in a field is related to an object in a method and what role each object plays in the claimed steps for constructing a call graph?

At claims 2, 9, what is T is and what does "each allocation of type T" include?

Furthermore, at claims 6, 7, 15, 16, "the call graph computed above" lacks antecedent basis. Note that although claims 1, 8, 10 recite the intended purpose of "selecting a program P for constructing a call graph representation thereof", no step in the claim language seems to accomplish this purpose. Note also that the claimed limitations of "zero or more" for example "zero or more fields", "zero or more edges", "zero or more types" are interpreted by the examiner as --zero--.

6. Art rejection of claims 1-16 is not being applied because the limitations cannot be ascertained.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bacon et al (US 6,654,951) teach removal of unreachable methods including determining directly called methods and virtually called methods.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
